

Case Study for Business Analyst Interview

Case Study Title: Improving Customer Onboarding Process for a Digital Bank

You are a Business Analyst working for a digital bank that has received customer feedback indicating dissatisfaction with its onboarding process. Customers find the process lengthy, confusing, and prone to errors. As a result, the bank has experienced a high drop-off rate during onboarding. Your task is to identify areas of improvement in the current onboarding process and propose a solution to enhance the customer experience.

Questions and Expectations

1. Problem Analysis

Question: How would you identify the root cause of the issues in the onboarding process?

What the interviewer is looking for:

- Ability to gather information through stakeholder interviews, surveys, or workshops.
- Understanding of techniques like root cause analysis, journey mapping, and customer persona development.

Example Answer:

"I would conduct interviews with stakeholders, including customers and internal teams, to understand pain points. I would also analyze customer feedback data and create a process flowchart to identify bottlenecks and inefficiencies."

2. Requirement Gathering

Question: How would you gather and document the requirements for a new onboarding process?

What the interviewer is looking for:

- Techniques like user stories, workshops, and observation.
- Knowledge of documenting requirements in clear, concise formats (e.g., BRD, user stories).

Example Answer:

"I would hold workshops with stakeholders to elicit functional and non-functional requirements. Then, I'd document them in user stories with acceptance criteria, ensuring alignment with the project goals."

3. Proposed Solution

Question: What solution would you propose to improve the onboarding process?

What the interviewer is looking for:

- Creativity and practicality in proposing solutions.
- Focus on automation, clarity, and user experience improvements.

****Example Answer**:**

"I would recommend developing a mobile-friendly onboarding process with clear instructions, automated ID verification, and progress tracking. A chatbot could be integrated to assist users with common queries."

4. Implementation Plan

****Question**:** How would you ensure the successful implementation of your proposed solution?

****What the interviewer is looking for**:**

- Focus on stakeholder collaboration and iterative delivery.
- Use of Agile or Waterfall methodologies, depending on the scenario.

****Example Answer**:**

"I'd suggest implementing the solution incrementally, starting with a prototype tested by a small user group. Feedback would be gathered and incorporated into subsequent iterations, ensuring continuous improvement."

5. Measurement of Success

****Question**:** How would you measure the success of the new onboarding process?

****What the interviewer is looking for**:**

- Metrics and KPIs to evaluate performance.
- Understanding of customer satisfaction measurement tools.

****Example Answer**:**

"Success would be measured using metrics like the onboarding completion rate, time taken for onboarding, and customer satisfaction scores from surveys."

Tips for Case Study Presentation

- ****Be Structured**:** Clearly define the problem, your approach, and proposed solutions.
- ****Be Collaborative**:** Emphasize stakeholder engagement throughout the process.
- ****Show Analytical Thinking**:** Use frameworks or tools to demonstrate logical analysis.
- ****Communicate Clearly**:** Use simple, business-oriented language.
